

New Series License Plates & Reserved Numbers Info

Every eight years Wyoming has new issue or a new “series” of license plates. That means the background picture and/or colors on the plate are different from the current license plates series.

2009-2016 Teton Series

2017-2025 Green Lake Series

Each county in the state has the option to save or hold back a sequence of numbers as “reserved”.

These designated numbers are held for the current possessor of that reserved number. Those people get first choice of keeping the same number for the new license plate series.

In Platte County your license number is “reserved” **IF** the number you currently have is one of the following:

Car 1 - 5000	Truck 1 - 5000	Large Trailer 1 - 1000	Small Trailer 1 - 1000	Motorcycle 1 - 1000
ATV 1 - 1000	Camper 1 - 200	Commercial 1 - 100	Handicap 1 - 50	

Note:

During the changeover from the 2009 to the 2017 series, it is possible that a *non-reserved* number (i.e. passenger #8501 or truck #6750) may be registered to two different vehicles and two different owners at the same time. Both plates are legal because one is the [2009 Teton Series](#)~~ and one is the new [2017 Green Lake Series](#).

The reserved and non-reserved plates for the new 2017 Green Lake series will be available January 2, 2017.

The reserved numbers will be held for the full year of 2017. Specifically Jan. 2, 2017 through Dec. 30, 2017.
